To properly prepare for your MRI please read this information and instructions carefully:

**Magnetic Resonance Imaging Open Environment:** Our Esaote Lunar E-Scan XQ© unit is very open, allowing you to lie comfortably while only the affected part of the body is placed in the scanner. It provides higher image clarity and greater accuracy than many other open MRI systems and is much quieter than traditional MRI.

**Testing Time:** Depending on the type of MRI ordered, testing may take 45 minutes or more to yield the highest quality diagnostic image. You will be asked to stay completely still during each 5-8 minute segment that the MRI is imaging. We want you to be comfortable and you may read, sleep or simply relax. The MRI equipment is kept cool so you may wish to bring a loose sweater and we will provide a blanket.

**You must wear or bring the correct clothing for your procedure – no metal**
- **Knee or Ankle test** = shorts or pants easily pushed well above the knee or ankle
- **Shoulder:**
  - Men = tank top or shirt with no metal snaps or metal buttons
  - Women = tank top or shirt, sports bra with no metal, no underwire
- **Elbow or Wrist** = short sleeves or shirt easily pushed well above elbow or wrist.
- **Remove all metal,** including jewelry, belts, watches, hair clips, hair pins, coins, magnetic strips

(You may be asked to remove glasses for certain tests)
